FOR WOMEN

Selene Wing

[PAT.P.]

BCJ-6910

- Enhanced lumbar and backpad for maximum comfort
- Three-dimensional "spandex" type bladder design
- Independent Harness System
- 2 zippered pockets
- Ultimate stabilizing harness
- 3-D bladder assures greatest buoyancy with compact size
- Rolled edge neckline
- Advanced Weight Loading System (A.W.L.S.)
- Shoulder strap width adjustment

BCJ-6910B

Quick inflator unit
Available in Europe only

Sizes	Lift Capacity
XS	32 lbf. (=14.3kgf., =140N)
S	32 lbf. (=14.3kgf., =140N)
M	32 lbf. (=14.3kgf., =140N)
L	32 lbf. (=14.3kgf., =140N)

Features

- Enhanced lumbar and backpad for maximum comfort

- 3-D bladder assures greatest buoyancy with compact size

By adding an extremely expandable spandex, a three-dimensional air cell, inner volume has been greatly increased. The benefit is a more compact design with greater buoyancy. Also, the BCJ-6910 uses a 840 denier nylon for optimum strength and durability.

- Ultimate stabilizing harness

A new Ultimate Stabilizing Harness has been developed for the BCJ-6910. In order to reduce the weight, the previous long rail type Ultimate Stabilizing Harness has been redesigned into a more compact size. Of course, the superior concept of the Ultimate Stabilizing Harness remains the same, with two rails firmly securing the tank. The harness is compact and yet tightly holds the tank, preventing it from slipping or shaking whether in the sea or on land.

- Advanced Weight Loading System (A.W.L.S.)

The A.W.L.S. allows the diver to insert weights into the weight-cartridges and loading them easily into the front of the BC jacket. Additionally, with weight distribution to the shoulder area, the weighted-down feeling that is traditionally associated with weight belts is eliminated. 4kg/8lbs. (maximum:

6kg/12lbs.) of weight can be placed in each of the left and right sides, and two pockets on the rear of the jacket can each hold up to 2kg/4lbs. of additional weight. (Total recommended weight: 10kg/20lbs.; maximum: 16kg/32lbs.) The weight cartridge is easy to release in an emergency, but the safety lock makes sure that it is not released accidentally.

- Shoulder strap width adjustment

New feature that allows the position of the shoulder belt behind the neck to be adjusted. Even ladies with narrow shoulders can be sure that the jacket will fit well and the load easier to bear.
