PLATINA plus

SF-5x N/A in Europe [PAT.P.]

- Newly designed Hybrid Blade System (H.B.S.)
- Multi-compound urethane fin gives unlimited kicking potential
- Maximum propulsion and comfort
- Superior memory resilience and rebound

The SF-5x Platina Plus is the most advanced urethane fin featuring a multi-compound design and TUSA's patented Hybrid Blade System (H.B.S.). The Platina Plus will complement a more traditional kicking style or a split-fin style kick. It is ideally suited for all conditions, consistently delivering superior performance and efficiency. The material characteristics of urethane and TUSA's superior design make the SF-5x Platina Plus the fin of the future.

- Superior memory resilience and rebound
- Multi-compound urethane fin gives unlimited kicking potential without sacrificing performance

• Available in stiffer Tech HBK compound (TA-80 Spring Strap option SF-5XT US only)

XPERT EVOLUTION PROPELLER-FIN™ TECHNOLOGY

FF-19 [PAT.P.]

- Innovative hydrofoil and hybrid rib design produce greater forward motion (lift) both on the surface and underwater
- Propeller-fin technology and super lightweight design achieve the ultimate performance with less effort
- 20° Angled Blade Design for improved efficiency
- Open-toe full foot pocket provides superb comfort and support
